PROJECT REPORT

Multi-Line Insurance Policy and Claims Management System

Project Information	Details
Project Title	Multi-Line Insurance Policy and Claims Management System
Platform	Salesforce CRM
Insurance Lines	Vehicle, Property, Life
Primary Users	Insurance Agents, Claims Adjusters, Senior Adjusters, Claims Managers
Core Technologies	Salesforce Lightning, Screen Flows, Record-Triggered Flows, Apex, LWC
Security	Permission Sets and State-Based Sharing Rules
Approval Threshold	High-value claims above ₹50,000

Executive Summary

The Multi-Line Insurance Policy and Claims Management System is a Salesforce-based solution designed to centralize and streamline the management of Vehicle, Property, and Life Insurance policies and claims. The solution replaces fragmented manual activities with structured Salesforce objects, Record Types, Field Sets, Screen Flows, Apex automation, Record-Triggered Flows, Approval Processes, Lightning Web Components, Permission Sets, and sharing rules.

The system supports guided policy quoting, product-specific policy information, premium calculation, VIN validation for vehicle policies, automated claim routing, a claims dashboard for adjusters, and multi-level approval for high-value claims. High-value claims above ₹50,000 are processed through Senior Adjuster and Department Manager approval stages. Role-based and state-based access controls support secure operational use.

The completed testing confirms the major business flows: VIN validation, automatic claim routing to the Auto Claims Queue, normal claim approval, high-value sequential approval, and rejection handling.

1. PROBLEM STATEMENT

An insurance carrier managing Vehicle, Property, and Life insurance requires a centralized Salesforce solution to reduce manual processing and standardize policy and claim operations.

1. Standardize and accelerate policy quoting and management.
2. Capture insurance-line-specific information.
3. Automate claim initiation and routing by policy type.
4. Provide centralized policy and claim visibility.
5. Automate high-value approval above ₹50,000.
6. Control access using Permission Sets and state-based sharing.

2. OBJECTIVES

- Design a flexible Policy and Claim data model for Vehicle, Property, and Life.
- Implement Record Types and Field Sets for product-specific data.
- Build an Auto Quoting Screen Flow.
- Validate VIN values using a 17-character rule.
- Calculate premium using Apex.
- Automatically route claims to the correct queue.
- Develop an LWC Claims Dashboard with filtering.
- Implement sequential Senior Adjuster and Department Manager approval.
- Provide Approve/Reject handling through a Screen Flow and Quick Action.
- Apply role-based Permission Sets and California/Texas sharing.

3. CHALLENGES

- Variable product data across Vehicle, Property, and Life.
- Guided quoting and validation.
- Consistent automated premium calculation.
- Correct queue routing.
- Sequential high-value approval.
- Operational dashboard visibility.
- Role and territory/state-based security.

4. SOLUTION APPROACH

The solution uses Salesforce as the centralized CRM platform. Policy and Claim objects provide the data model; Record Types and Field Sets support insurance lines; Screen Flows provide guided interaction; Apex performs premium and dashboard logic; Record-Triggered Flows automate routing and approval submission; LWC provides dashboard visibility; Permission Sets and sharing rules provide controlled access.

MILESTONES

5. MILESTONE 1: CORE DATA MODEL & POLICY CONFIGURATION

User Story 1: Creation of Custom Objects

1. Create Policy Custom Object

- Go to Setup → Object Manager → Create → Custom Object.
- Set Label : Policy
- Plural Label : Policies.
- Use Policy Number as the Auto Number record name.
- Enable required reporting, activities and field history options.
- Set Deployment Status to Deployed and enable search.
- Save the object.

Custom Object Definition

The singular and plural labels are used in lists, single layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label: Policy Example: Account
Plural Label: Policies Example: Accounts
Starts with record name: ☐

The Object Name is used when referencing the object via the API.
Object Name: Policy Example: Account
Description:

Contact Association Help Setting: ☒ Open the standard Salesforce.com Help & Training window ☐ Open a ribbon using a visualforce page

Contact Name:

Enter Record Name Label and Format

The Record Name appears in page layouts, key tabs, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: Policy Name Example: Account Name
Name Type: Pick List (dropdown) Warning: If you plan to build a high volume of records in this object, via the API for example, use the "Text" data type.
Display Format: P-XXXXX Example: A-00000 (that is True)

2. Define Policy Record Types

- Open Policy in Object Manager.
- Select Record Types → New.
- Create Auto/Vehicle, Property, and Life record types.
- Provide descriptions, activate them, and make them available to required profiles.
- Save each record type.

The screenshot shows the 'Add Record Type' dialog in the Policy Object Manager. The dialog is titled 'Auto' and contains the following fields:

- Record Type Label:** A text input field containing 'Auto'.
- Record Type Name:** A text input field containing 'Auto'.
- Description:** A text input field containing 'Record type for Auto Insurance Policies'.
- Active:** A checkbox that is checked.

At the bottom of the dialog are 'Save' and 'Cancel' buttons. A sidebar on the left lists various configuration options, with 'Record Types' currently selected.

Repeat the same steps for creating the property and life record types as well.

The screenshot shows the 'Record Types' list in the Policy Object Manager. The list is titled 'Record Types' and has a 'Quick Find' search bar. The list contains three record types:

RECORD TYPE LABEL	DESCRIPTION	ACTIVE	MODIFIED BY
Auto	Record type for Auto Insurance Policies	✓	Brenda M. 29/08/2024, 1:07 pm
Life	Record type for Life Insurance Policies	✓	Brenda M. 28/08/2024, 12:07 pm
Property	Record type for Property Insurance Policies	✓	Brenda M. 26/08/2024, 12:01 pm

The sidebar on the left shows the 'Record Types' option is selected.

3. Create Policy Field Sets

Insurance Line	Fields
Vehicle / Auto	VIN, Model Year
Property	Square Footage, Year Built
Life	Beneficiary Name, Policy Term Months

Create the vehicle field sets in the policy (object manager)

The screenshot shows the 'Policy' object in the Object Manager. The 'Field Sets' tab is selected. A field set named 'Vehicle' is being configured. The 'Available for the Field Set' list contains various fields, and the 'In the Field Set' list contains 'VIN' and 'Model Year'.

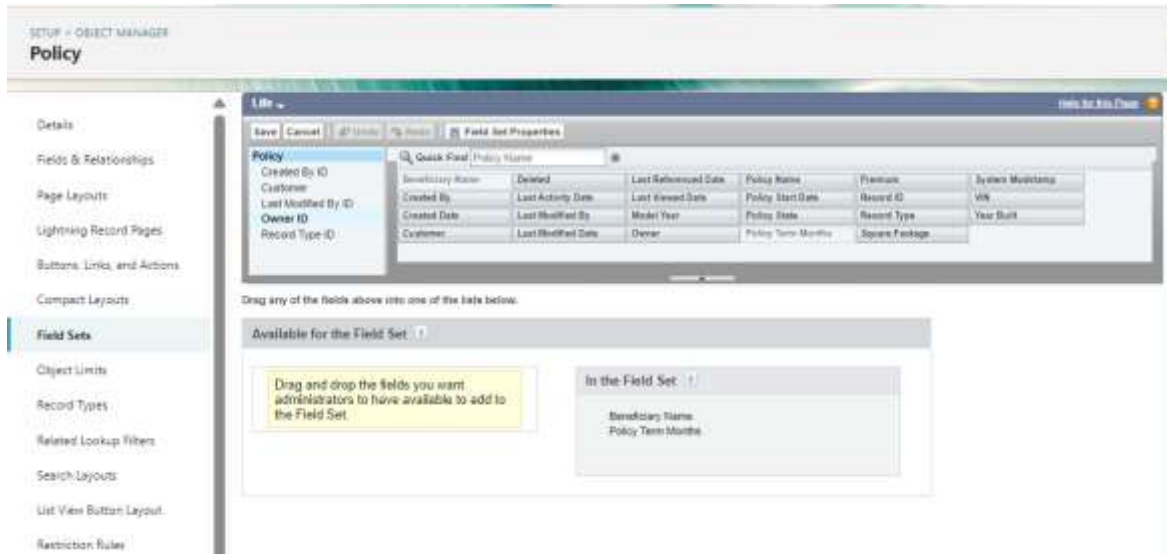

Available for the Field Set		In the Field Set	
Created By (ID)	Deleted	VIN	
Created By	Last Activity Date	Model Year	
Last Modified By (ID)	Last Viewed Date		
Owner ID	Model Year		
Record Type ID	Owner		

Create the Property field sets in the policy (object manager)

The screenshot shows the 'Policy' object in the Object Manager. The 'Field Sets' tab is selected. A field set named 'Property' is being configured. The 'Available for the Field Set' list contains various fields, and the 'In the Field Set' list contains 'Square Footage' and 'Year Built'.

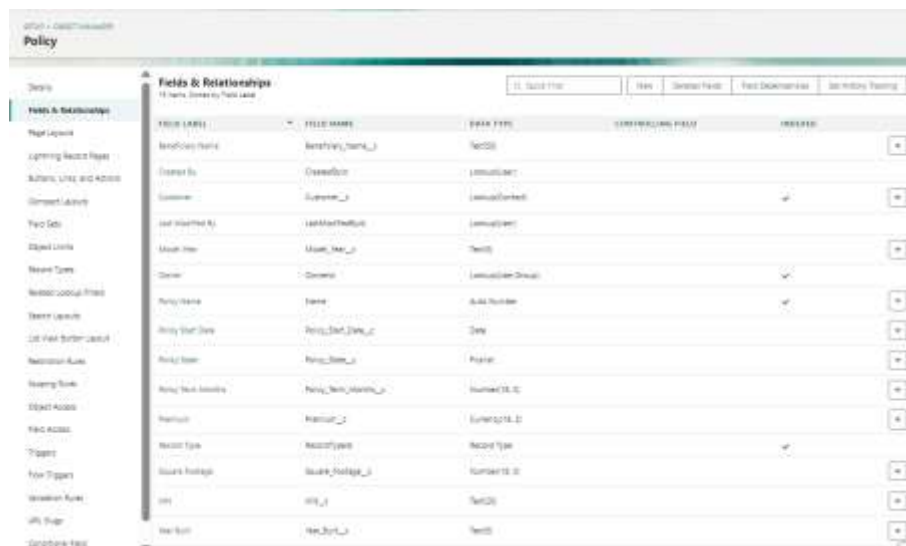

Available for the Field Set		In the Field Set	
Created By (ID)	Deleted	Square Footage	
Created By	Last Activity Date	Year Built	
Last Modified By (ID)	Last Viewed Date		
Owner ID	Model Year		
Record Type ID	Owner		

Create the Life field sets in the policy (object manager)

4. Policy Object Fields

Field	Data Type
Beneficiary Name	Text
Customer	Lookup(Contact)
Model Year	Text
Policy Start Date	Date
Policy Term Months	Number
Premium	Currency
Square Footage	Number
VIN	Text
Year Built	Text
Policy State	Picklist

5. Create Claim Custom Object

- Open Setup → Object Manager → Create → Custom Object.
- Set Label as Claim.
- Configure Claim Number as Auto Number.
- Enable required reporting, activities, field history, deployment and search.
- Save.

The screenshot shows the 'Setup' page in Salesforce, specifically the 'Object Manager' section. The 'Claim' custom object is being edited. The left sidebar lists various setup areas, and the main content area is titled 'Edit Custom Object: Claim'. The 'Custom Object Definition Edit' section includes fields for 'Label' (set to 'Claim'), 'Plural Label' (set to 'Claims'), and 'Starts with word (lower)' (set to 'Claim'). The 'Object Name' is 'Claim', and the 'Description' field is empty. The 'Enter Record Name Label and Format' section shows 'Record Name' as 'Claim Name' and 'Data Type' as 'Auto Number'. The 'Optional Features' section has checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Learning'. The 'Content Name' field is set to 'Claim'.

The screenshot shows the 'Setup' page in Salesforce, specifically the 'Object Manager' section. The 'Claim' custom object is being edited. The left sidebar lists various setup areas, and the main content area is titled 'Edit Custom Object: Claim'. The 'Object Classification' section has checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Learning'. The 'Deployment Status' section has checkboxes for 'In Development' and 'Deployed'. The 'Search Basics' section has a checkbox for 'Allow Search'. The 'Content Name' field is set to 'Claim'.

6. Claim Record Types

- Open Claim → Record Types → New.
- Create Accident, Property and Life record types.
- Activate and make available as required.
- Save.

Accident:

The screenshot shows the 'Edit Record Type' form for 'Accident' in the Claim module. The left sidebar contains a list of configuration options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types (selected), Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules, and Scoping Rules. The main form area is titled 'Edit Record Type' and 'Accident'. Below the title, it says 'Enter a new name for the selected record type and click Save.' The form contains the following fields: 'Record Type Label' with the value 'Accident', 'Record Type Name' with the value 'Accident', 'Namespace Prefix' (empty), 'Description' (empty), and 'Active' with a checked checkbox. At the bottom right, there are 'Save' and 'Cancel' buttons.

Life:

The screenshot shows the 'Edit Record Type' form for 'Life' in the Claim module. The left sidebar is identical to the previous screenshot, with 'Record Types' selected. The main form area is titled 'Edit Record Type' and 'Life'. Below the title, it says 'Enter a new name for the selected record type and click Save.' The form contains the following fields: 'Record Type Label' with the value 'Life', 'Record Type Name' with the value 'Life', 'Namespace Prefix' (empty), 'Description' (empty), and 'Active' with a checked checkbox. At the bottom right, there are 'Save' and 'Cancel' buttons.

6. MILESTONE 1: AUTO QUOTING & POLICY ISSUANCE

1. Create Auto Quoting Screen Flow

- Go to Setup → Flows → New Flow → Screen Flow.
- Retrieve the Auto Policy Record Type using Get Records.
- Capture Policy Holder, Policy Start Date and Policy State.
- Capture VIN and Model Year on the vehicle details screen.
- Create the draft Policy record and map screen values.
- Store the created Policy Id in a flow variable.
- Save and Activate.

Auto Quoting Screen Flow in Flow Builder

Auto Quoting – Basic Information

AutoQuotingFlow	
Enter the basic information for the Auto Policy.

Policy State	--None--

Auto Quoting – Vehicle Details

AutoQuotingFlow

Enter the vehicle-specific details.

VIN

1HGCM82633A123456

Model Year

2020

2. VIN Validation

The Policy object uses a validation rule for Auto policies requiring exactly 17 VIN characters. The implemented test with 12345 displays the configured validation error and prevents invalid data from being accepted.

VIN Validation Error for Invalid VIN

The screenshot shows the 'Coral Cloud Resorts' policy creation interface. The 'Information' tab is active, displaying various fields for policy creation. The 'VIN' field is highlighted with a red border and contains the value '12345'. A red error message is displayed below the field: 'VIN must be exactly 17 characters.' A red dialog box with the title 'We hit a snag.' is overlaid on the bottom of the form, with the message 'Review the following fields' and a list containing 'VIN'. The dialog box has 'Cancel' and 'Save & Flow' buttons.

The Premium Calculator Apex class receives the Policy Id, retrieves relevant policy data, calculates the premium using the implemented business rules, and returns the result to the Auto Quoting Flow. The Flow then updates the Premium field.

[illegible]

Code:

```
public class PremiumCalculator {
    public class PremiumInputWrapper {
        @InvocableVariable(required=true)
        public Id policyId;
    }

    @InvocableMethod(label='Calculate Policy Premium' description='Calculates premium based on po
    licy fields (VIN, Model Year, State).')
    public static List<Decimal> calculatePremium(List<PremiumInputWrapper> inputs) {

        List<Decimal> premiumResults = new List<Decimal>();
        Set<Id> policyIds = new Set<Id>();

        for (PremiumInputWrapper input : inputs) {
            if (input.policyId != null) {
                policyIds.add(input.policyId);
            }
        }

        List<Policy__c> policiesToRate = [
            SELECT Id, VIN__c, Model_Year__c, Policy_State__c
            FROM Policy__c
            WHERE Id IN :policyIds
        ];

        for (Policy__c policy : policiesToRate) {
            Decimal basePremium = 1000.00;

            if (policy.Policy_State__c == 'CA') {
                basePremium *= 1.15;
            } else if (policy.Policy_State__c == 'TX') {
                basePremium *= 1.05;
            }

            if (policy.Model_Year__c != null && Integer.valueOf(policy.Model_Year__c) < 2018) {
                basePremium += 100;
            }

            premiumResults.add(basePremium);
        }

        return premiumResults;
    }
}
```

4. Policy Creation Output

A successful Auto Quoting execution creates a Policy containing customer, start date, state, VIN, model year, record type and calculated premium.

Completed Auto Policy

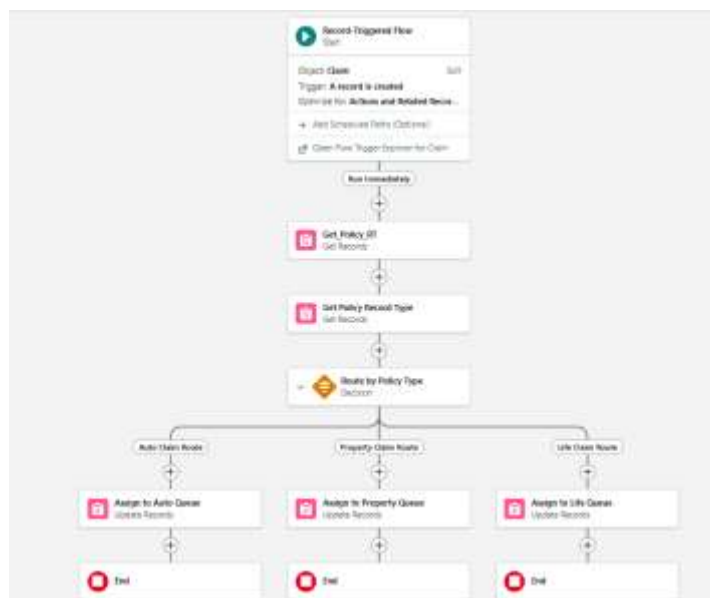

7. MILESTONE 2: CLAIM ROUTING AUTOMATION

1. Create Record-Triggered Claim Routing Flow

- Create a Record-Triggered Flow on Claim.
- Retrieve the related Policy.
- Evaluate Policy Record Type using a Decision element.
- Create Auto, Property and Life routing outcomes.
- Assign Auto claims to Auto Claims Queue.
- Assign Property claims to Property Claims Queue.
- Assign Life claims to Life Claims Queue.
- Save and Activate.

8. MILESTONE 3: CLAIMS ADJUSTER LWC DASHBOARD

1. ClaimsAdjusterController Apex Class

The controller retrieves claims owned by the logged-in user and prepares a wrapper containing claim number, claim amount, status, policy type, policy holder name, and days open. Related Policy and Customer data are retrieved for the dashboard.

ClaimsAdjusterController Apex Class

Code:

```
public class ClaimsAdjusterController {

    public class ClaimWrapper {

        @AuraEnabled public Id claimId;
        @AuraEnabled public String claimNumber;
        @AuraEnabled public Decimal claimAmount;
        @AuraEnabled public String status;
        @AuraEnabled public String policyType;
        @AuraEnabled public String policyHolderName;
        @AuraEnabled public Integer daysOpen;

        public ClaimWrapper(
            Claim__c claim,
            Policy__c policy,
            Contact customer
        ) {
```

```
this.claimId = claim.Id;  
this.claimNumber = claim.Name;  
this.claimAmount = claim.Claim_Amount__c;  
this.status = claim.Approval_Status__c;
```

```
if (policy != null && policy.RecordType != null) {  
    this.policyType = policy.RecordType.Name;  
} else {  
    this.policyType = 'Unknown';  
}
```

```
if (customer != null) {  
    this.policyHolderName = customer.Name;  
} else {  
    this.policyHolderName = "";  
}
```

```
if (claim.Date_of_Loss__c != null) {  
    this.daysOpen =  
        claim.Date_of_Loss__c.date()  
        .daysBetween(Date.today());  
} else {  
    this.daysOpen = 0;  
}  
}  
}
```

```
@AuraEnabled(cacheable=true)  
public static List<ClaimWrapper> getAssignedClaims() {  
    List<ClaimWrapper> results =  
        new List<ClaimWrapper>();  
    List<Claim__c> claims = [  
        SELECT  
            Id,  
            Name,  
            Claim_Amount__c,  
            Approval_Status__c,  
            Date_of_Loss__c,  
            Policy__r.Name,  
            Policy__r.RecordType.Name,  
            Policy__r.Customer__r.Name  
        FROM Claim__c
```

```
WHERE OwnerId = :UserInfo.getUserId()
```

```
ORDER BY Date_of_Loss __c DESC
```

```
];
```

```
for (Claim __c claim : claims) {
```

```
    Policy __c policy = claim.Policy __r;
```

```
    Contact customer =
```

```
        (policy != null && policy.Customer __r != null)
```

```
        ? policy.Customer __r
```

```
        : null;
```

```
    results.add(
```

```
        new ClaimWrapper(
```

```
            claim,
```

```
            policy,
```

```
            customer

```
}
```

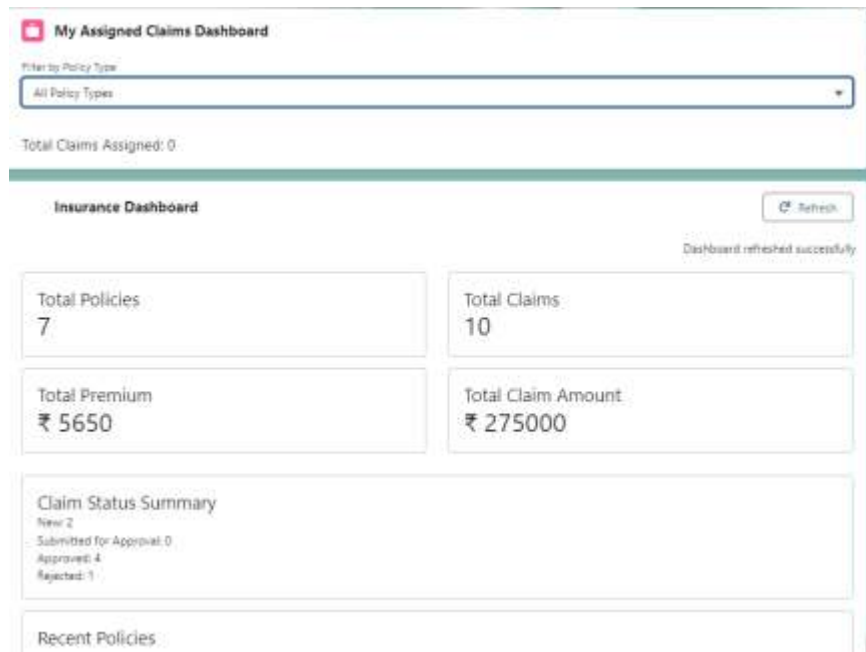

```
}
```

2. Claims Dashboard LWC

Claims Dashboard LWC – Full Dashboard

- Create claimsDashboardLwc.
- Expose it for Lightning App, Home and Record pages as required.
- Use @wire to call getAssignedClaims.
- Display assigned claims using reusable claim tiles.
- Provide All, Auto, Property and Life filtering.
- Display the total number of visible assigned claims.

Claims Dashboard Filtering

Code: claimsDashboardLwc.html

```
<template>
```

```

2. High-Value Claim Approval Process

- Open Setup → Approval Processes and select Claim.
- Create High Value Claim Approval.
- Set entry criteria: Claim Amount greater than ₹50,000.
- Allow the Claim owner as initial submitter.
- Create Step 1 for Senior Adjuster.
- Create Step 2 for Department Manager.
- Configure the steps sequentially.
- Update Approval Status to Submitted for Approval on submission.
- Update to Approved on final approval.
- Update to Rejected on final rejection.
- Activate.

Step 1: High-Value Claim Approval Process Configuration

The screenshot shows the 'Approval Processes' setup page for 'High Value Claim Approval'. It is at 'Step 1. Enter Name and Description'. The form includes fields for 'Process Name' (filled with 'High Value Claim Approval'), 'Unique Name' (filled with 'High_Value_Claim_Approval'), and 'Description' (empty). Navigation buttons 'Save' and 'Next' are visible at the bottom right.

Under specify entry criteria, Select criteria are met

The screenshot shows 'Step 2. Specify Entry Criteria' for the 'High Value Claim Approval' process. It includes a dropdown menu set to 'criteria are met'. Below is a table for defining criteria:

Field	Operator	Value	
Claim: Claim Amount	greater than	50,000	AND
-None-	-None-		AND
-None-	-None-		AND
-None-	-None-		AND
-None-	-None-		

Buttons for 'Previous', 'Save', 'Next', and 'Cancel' are at the bottom right.

Under Record Editability properties, Select Administrators ONLY can edit the records during the approval process

Approval Process Edit
High Value Claim Approval

Step 3: Specify Approver Field and Record Editability Properties

When you define approval steps, you can assign approval requests to different users. One of your options is to use a user field to automatically route these requests. If you want to use this option for any of your approval steps, select a field from the picklist below. Also, when a record is in the approval process, it will always be locked-- only an administrator will be able to edit it. However, you may choose to also allow the currently assigned approver to edit the record.

Select Field Used for Automated Approval Routing

Next Automated Approver Determined By: None

Use Approver Field of Claim Owner

Record Editability Properties

- ☒ Administrators ONLY can edit records during the approval process.
- ☐ Administrators OR the currently assigned approver can edit records during the approval process.

Under Initial Submitters, Search for owner under submitter type, and select the claim owner as allowed submitters from available submitters

Approval Processes

Approval Process Edit
High Value Claim Approval

Step 4: Select Notification Templates

Select the email template that will be used to notify approvers that an approval request has been assigned to them. Note that this template will be used for all steps for this process. [Create a new email template](#)

Email Template

Approval Assignment Email Template: Claim Approval Assignment

Under Approval Page Layout, Select Claim Number, Owner, Claim Amount, Adjuster, Policy fields to the selected fields from available fields

Approval Process Edit
High Value Claim Approval

Step 5: Select Fields to Display on Approval Page Layout

The approval page is where an approver will actually approve or reject a request. Using the options below, choose the fields to display on this page.

Available Fields		Selected Fields
Claim Amount	Add Remove	Adjuster
Created By		Approval Status
Last Modified By		Claim Name
		Date of Loss

High-Value Claim Pending Approval

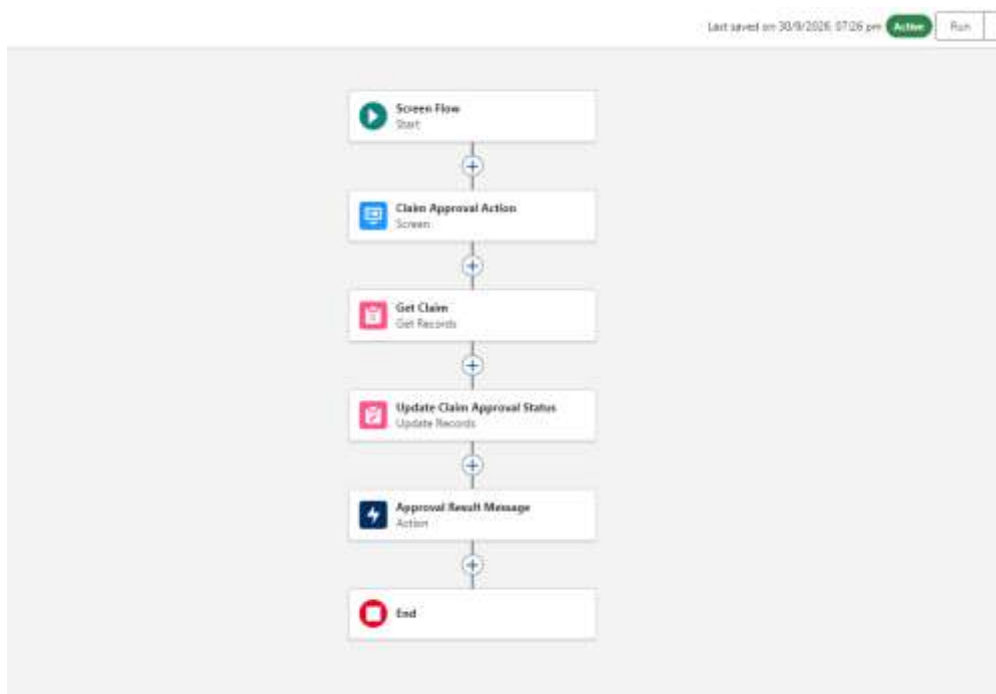

The screenshot shows a web interface for a claim approval process. At the top, there's a header for 'Claim C-0008'. Below it, there are two tabs: 'Related' and 'Details'. The 'Related' tab is active, showing an 'Approval History (3)' section with a table of steps: 'Department Manager Approval', 'Senior Adjuster Approval', and 'Approval Request Submitted'. To the right of this is a 'Claim Approval' section with a 'Pending' status, showing 'Submitter: Brindha M', 'Date Submitted: 30-Sept-2026', 'Actual Approver: Brindha M', and 'Assigned To: Brindha M'. Further right is an 'Assigned To' table listing 'Brindha M' three times. At the bottom right, there are 'Approve' and 'Reject' buttons.

Step Name	Submitter	Date Submitted	Actual Approver	Assigned To
Department Manager Approval	Brindha M	30-Sept-2026	Brindha M	Brindha M
Senior Adjuster Approval				Brindha M
Approval Request Submitted				Brindha M

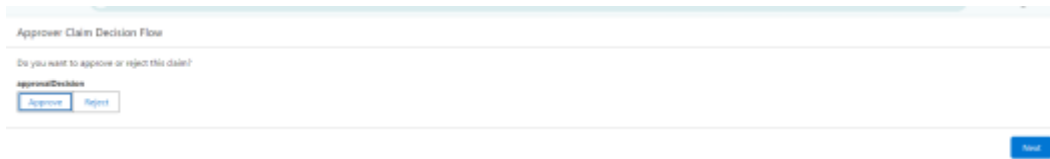

4. Approver Screen Flow

- Create a Screen Flow with input variable recordId.
- Get the Claim record.
- Display Claim Number, Amount and Policy Type.
- Provide Approve and Reject choices.
- Capture Approver Comments.
- Use Decision to determine the selected action.
- Execute the configured approval/rejection action.
- Save and Activate.

10. TESTING & VALIDATION

Test Case	Scenario	Expected Result	Status
TC-01	Invalid VIN 12345	VIN must be exactly 17 characters	Pass
TC-02	Auto policy Accident claim	Auto Claims Queue	Pass
TC-03	Normal approval	Approved	Pass
TC-04	₹60,000 claim	Submitted/Pending approval	Pass
TC-05	Senior Adjuster approval	First stage completed	Pass
TC-06	Department Manager approval	Approved	Pass
TC-07	Rejection	Rejected	Pass

Invalid VIN Validation

The screenshot shows a form with fields for Premium, Square Footage, VIN, Year Built, and Policy Status. The VIN field contains the value '12345'. A red error message is displayed below the VIN field: 'VIN must be exactly 17 characters.' A red alert box with a close button (X) is overlaid on the form, containing the text 'We hit a snag.' and 'Review the following fields' with a bulleted list containing 'VIN'. At the bottom of the form, there are buttons for 'Cancel', 'Save & New', and 'Save'.

Auto Claim Routing

The screenshot shows the 'Auto Claims Queue' interface. It features a table with columns for 'Owner', 'Auto Claims Queue', and a status column. The 'Auto Claims Queue' column contains a list of claims. To the right of the table is a sidebar with a vertical teal bar and icons for a calendar and an envelope. The status column shows a green checkmark icon.

2. State-Based Sharing

California and Texas state-based sharing configurations were created using public groups and sharing rules to control access to relevant records.

California Insurance Team

The screenshot shows the 'Group Membership' interface for the 'California Insurance Team'. The 'Group Information' section includes fields for 'Label' (California Insurance Team), 'Group Name' (California Insurance Team), and a checked 'Grant Access Using Hierarchy' option. Below this is a search bar set to 'Public Groups' and a list of 'Available Members' including 'All Customer Portal Users', 'All Internal Users', 'All Partner Users', and 'Group: Texas Insurance Team'. The 'Selected Members' list contains 'Brindha M'. 'Add' and 'Remove' buttons are positioned between the two lists. 'Save' and 'Cancel' buttons are at the bottom.

Texas Insurance Team

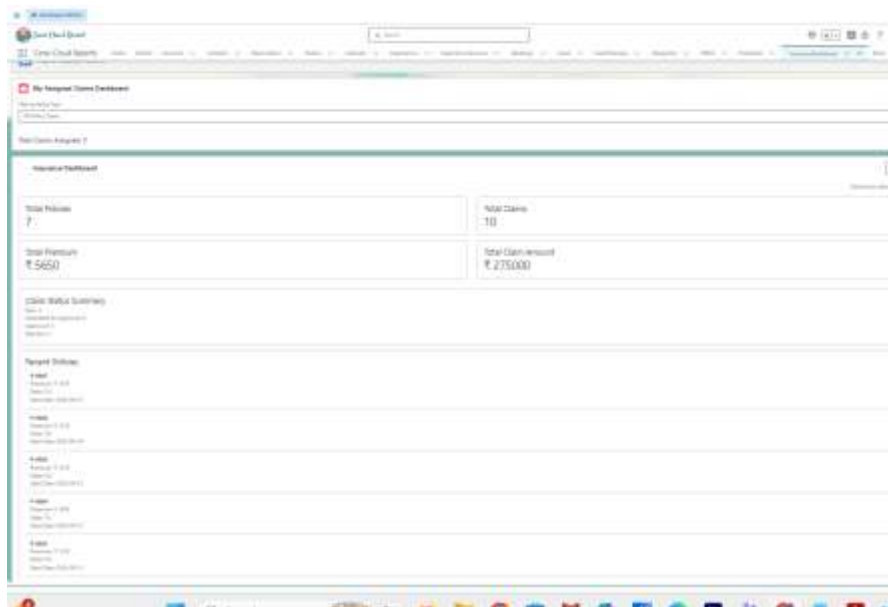

The screenshot shows the 'Group Membership' interface for the 'Texas Insurance Team'. The 'Group Information' section includes fields for 'Label' (Texas Insurance Team), 'Group Name' (Texas Insurance Team), and a checked 'Grant Access Using Hierarchy' option. Below this is a search bar set to 'Public Groups' and a list of 'Available Members' including 'All Customer Portal Users', 'All Internal Users', 'All Partner Users', and 'Group: California Insurance Team'. The 'Selected Members' list contains 'Brindha M'. 'Add' and 'Remove' buttons are positioned between the two lists. 'Save' and 'Cancel' buttons are at the bottom.

12. RESULTS & OUTCOMES

- Centralized Vehicle, Property and Life policy and claim management.
- Guided Auto Quoting.
- 17-character VIN validation.
- Apex premium calculation.
- Automatic claim queue routing.
- LWC Claims Dashboard and filtering.
- High-value approval above ₹50,000.
- Sequential Senior Adjuster and Department Manager approval.
- Approve/Reject handling.
- Role-specific Permission Sets.
- California/Texas state-based sharing.
- Core scenarios successfully validated.

13. DEMONSTRATION SEQUENCE

Overall Application

- Open Salesforce insurance application.
- Show Policy and Claim objects.
- Show Vehicle, Property and Life Record Types.
- Run Auto Quoting Flow.
- Demonstrate invalid VIN.
- Create valid Auto Policy.

- Show premium.
- Create Accident Claim and show Auto Claims Queue routing.
- Open Claims Dashboard and apply filter.
- Open ₹60,000 claim and show pending approval.
- Show Senior Adjuster approval.
- Show Department Manager approval.
- Demonstrate rejection.
- Show Permission Sets and state sharing.
- Show reports and architecture.

Project Architecture:

User → Salesforce UI → Screen Flow → Policy/Claim Objects → Apex → Record-Triggered Flow → Approval Process → LWC Dashboard → Security/Sharing

14. CONCLUSION

The Multi-Line Insurance Policy and Claims Management System demonstrates a centralized Salesforce solution for multiple insurance products and claims. The implementation combines data modeling, guided Screen Flows, Apex logic, Record-Triggered automation, LWC, Approval Processes, Permission Sets and state-based sharing.

The completed solution supports policy creation, Auto quoting, VIN validation, premium calculation, claim routing, dashboard visibility, high-value approval, rejection handling and controlled access. The tested scenarios confirm the core implemented workflows.

15. FUTURE ENHANCEMENTS

- External VIN/vehicle data services.
- Customer self-service portal.
- Document upload and classification.
- Email/SMS notifications.
- Fraud detection and risk scoring.
- Additional insurance products.
- Territory/branch sharing.
- CRM Analytics.
- SLA monitoring and escalation.
- Payment, repair and third-party integrations.

Project Development Phase

Product Backlog, Sprint Schedule, and Estimation

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Core Data Model & Policy Configuration	USN-1	As an administrator, I want to create Policy and Claim objects, record types, fields, field sets, and relationships so that Vehicle, Property, and Life insurance data can be managed systematically.	5	High	Brindha M
Sprint-2	Policy Quoting & Validation	USN-2	As an insurance agent, I want to use an Auto Quoting Screen Flow to capture policy holder, policy date, state, VIN, and model year so that an Auto policy can be created through a guided process.	5	High	Priyanka P
Sprint-2	Policy Quoting & Validation	USN-3	As a system, I want to validate that an Auto policy VIN contains exactly 17 characters so that invalid vehicle information is prevented.	3	High	Madhumathi M
Sprint-3	Premium Calculation & Claim Routing	USN-4	As a system, I want Apex to calculate the policy premium based on policy information so that premium values are calculated automatically.	5	High	Kanimozhi B
Sprint-3	Premium Calculation & Claim Routing	USN-5	As a system, I want to automatically route claims to the correct Auto, Property, or Life claims queue so that claims are assigned to the appropriate team.	5	High	Jamuna R
Sprint-4	Claims Dashboard & Processing	USN-6	As a claims adjuster, I want an LWC dashboard showing my assigned claims with policy type, claimant, amount, status, and days open so that I can efficiently monitor claims.	5	High	Priyanka P
Sprint-5	High-Value Claim Approval	USN-7	As a system, I want claims above ₹50,000 to automatically enter the approval process so that high-value claims receive appropriate authorization.	5	High	Brindha M

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-5	High-Value Claim Approval	USN-8	As a Senior Adjuster and Department Manager, I want sequential approval of high-value claims so that claims are reviewed at the required approval levels.	5	High	Kanimozhi B
Sprint-6	Security, Reporting & Final Validation	USN-9	As an insurance manager, I want role-based access, state-based sharing, reports, and dashboards so that insurance operations can be securely monitored and managed.	4	Medium	Jamuna R

Project Tracker, Velocity & Burndown Chart

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	5	1 Day	28 Sep 2026	28 Sep 2026	5	28 Sep 2026
Sprint-2	8	1 Day	29 Sep 2026	29 Sep 2026	8	29 Sep 2026
Sprint-3	10	1 Day	30 Sep 2026	30 Sep 2026	10	30 Sep 2026
Sprint-4	5	1 Day	01 Oct 2026	01 Oct 2026	5	01 Oct 2026
